

# *Digitize your microfiche data*

Now the valuable data contained on archived microfiche files can be used on your PC. ***Harness the power of digital data*** with microfiche scanned into an image format with indexed search and retrieval capabilities.

Utilizing high speed microfiche scanning equipment and image enhancement software we produce comprehensive files that are immediately usable in existing document retrieval systems or as stand-alone files.

Medical Records, Insurance Files, Accounting Reports and Statements are just a few examples of the data types that can be inexpensively scanned.

Input can be from COM and Source Document generated microfiche and jackets. Output formats include TIFF and PDF onto CD, DVD, tape or directly to a client based systems via FTP. Documents can also be accessed via the internet using **COMPUWeb**, our data hosting system.

With ***direct output to print*** capability we can also generate paper documents for court cases and research projects as well.
